DR ANG CHEE WAN

COMPREHENSIVE PERIODONTICS

10 – 11 APRIL 2027

Level 5, The Dental Academy, Bentley Music, 3, Jalan PJU 7/2, Mutiara Damansara, 47810 Petaling Jaya, Selangor

Course Summary

It is increasingly important for general practitioners to be proficient in periodontal surgery. Periodontal surgery techniques are not routinely taught in dental school. This course is designed to enhance and develop the practitioner's skill in basic and advanced periodontal flap surgery. The surgical procedures taught will provide a clear understanding of the technicalities of each procedure. Upon completion of this course, you would have acquired the critical skills to perform periodontal surgery in your clinical practice.

Learning Objectives

- Biology of normal periodontium
- Etiology and classification of periodontal diseases
- Diagnosis and treatment planning
- Radiographic interpretation
- Instruments and armamentium
- Non-surgical periodontal therapy
- Surgical periodontal therapy
- Flap design
- Gingival overgrowth
- Grafting material selection
- Suture materials
- Suturing techniques
- Guided Tissue Regeneration
- Post-operative care

Course Coordinator

Dr Ang Chee Wan

Clinical Director,
T32 Specialist Division
Dental Specialist in Periodontology
BDS (Singapore),
MDS (Periodontology) (Singapore),
MRD RCS (Edinburgh, UK)
Visiting Faculty,
National University of Singapore

Dr Ang Chee Wan graduated with a Bachelor of Dental Surgery from the National University of Singapore (NUS) and subsequently obtained a Master of Dental Surgery in Periodontology. He also received his fellowship in periodontology from the Royal College of Surgeons of Edinburgh, United Kingdom.

An accredited periodontology specialist registered with the Singapore Dental Council, Dr Ang serves as a visiting specialist with the Singapore Armed Forces and the National University Hospital. He also teaches undergraduate and postgraduate students at NUS and shares his expertise through organisations such as the International Dental Academy (IDA) and the Singapore Academy of Oral Rehabilitation and Implantology (SAORI).

Dr Ang is an active member of several professional organisations, including the Society of Periodontology (Singapore), the Aesthetic Dentistry Society of Singapore, and the International Team for Implantology.

His clinical expertise encompasses periodontal treatment, gum and bone grafting, aesthetic gum surgery, and dental implant procedures. His special interests include periodontal plastic surgery, minimally invasive surgery, and bone regeneration. Dedicated to advancing clinical care, Dr Ang is recognised for incorporating the operating microscope into his periodontal surgical practice.

Course Curriculum

Day 1
Saturday
10 April 2027

- Biology of normal periodontium
- Etiology of periodontal disease
- Interpretation of radiographs
- Classification of periodontal disease
- Diagnosis of periodontal disease
- Non-surgical periodontal therapy – Principles and instruments
- Non-surgical periodontal therapy – Ultrasonic vs hand instruments
- Surgical periodontal therapy – Principles and techniques
- Surgical periodontal therapy – Selection criteria
- Flap design – Modified Widman, distal wedge, enhanced scallop, double scallop, etc. (Hands-on)

Day 2
Sunday
11 April 2027

- Treatment planning of periodontal disease
- Gingival overgrowth – Diagnosis and treatment
- Guided Tissue Regeneration – Principles and indications
- Guided Tissue Regeneration – Flap design, material selection, suturing technique
- Suturing materials
- Suturing techniques (Hands-on)
- Post-operative care
- Guided Tissue Regeneration (Hands-on)

Course Fee

RM 3,500
