

THE DENTAL ACADEMY MALAYSIA PRESENTS

Prof. Carlos de Carvalho from Brazil

Total focus on
Ceramic Veneers,
Esthetic Planning,
and
High-Performance
Adhesive
Cementation

21-23 AUGUST 2026

IMMERSION IN IMMERSION IN **ADHESIVE** **REHABILITATION**

PROF. CARLOS DE CARVALHO

With more than 20 years of clinical and academic experience, Prof. Carlos de Carvalho is a national and international reference in esthetic dentistry and adhesive rehabilitation.

Education:

Dentistry degree from Universidade de Itaúna (MG), Master's degree from the University of Siena (Italy), and a PhD in Restorative Dentistry from USP-Bauru.

Experience:

Trained over 2,000 dentists in hands-on courses focused on ceramic veneers, minimally invasive preparation, and advanced adhesive protocols.

Differential:

Combines technical precision, clear clinical language, and focus on esthetic predictability, always rooted in science with immediate clinical application.

International background:

Italy, USA, Brazil

Esthetic Rehabilitation:

Specialist in ceramic veneers

Applied teaching:

Direct, clinically oriented content

International recognition:

Conferences and courses across the USA, Europe, and Latin America

What is the **IMMERSION IN?** **ADHESIVE REHABILITATION?**

Technical knowledge, immediate application, and predictable esthetics.

This in-person intensive program with Prof. Carlos de Carvalho focuses entirely on ceramic veneers, functional esthetic planning, and high-performance adhesive protocols.

The premium structure and direct guidance from the professor offer a complete journey: from diagnosis to final finishing, with applied theory, hands-on practice, and clinical demonstrations.

More than just a course, it is an experience of technical refinement and clinical differentiation.

- Advanced ceramic veneers: precise and predictable techniques
- Functional esthetic planning: from diagnosis to personalized mock-up
- High-performance cementation: full control of adhesive protocol
- Hands-on with direct feedback: guided training with the professor

Who is this for?

For dentists who want more than learning – those who want to become a reference.

The immersion is designed for dentists already working in esthetic dentistry or those entering this field with a solid foundation, technical refinement, and strategic vision.

- Experienced clinicians, professors, and specialists aiming to refine predictability, control, and esthetic finishing.
- Dentists transitioning to esthetic dentistry, who want to start with validated methods and strategic insight.
- Professionals seeking authority in the esthetic dentistry market.

What will you learn?

Across three days, you will deepen your knowledge of adhesive esthetic dentistry with a 100% clinical, applied, and technical approach.

Main topics include:

1. Minimally invasive ceramic veneers
2. Applied digital esthetic planning
3. Clinical preparation: veneers, fragments, and guides
4. Isolation and thickness control
5. Predictable adhesive cementation
6. Hands-on with technical correction
7. Finishing and occlusal adjustment
8. Real clinical case discussions

TEENTATIVE

DAY 1

21 AUGUST 2026

Esthetic Philosophy, Planning & Morphology (Lectures + Live Demonstrations)

9:00 – 10:30:

- Philosophy of minimally invasive esthetic adhesive rehabilitation • Principles of esthetic logic and personalized morphology

10:30 – 10:45: Break

10:45 – 12:30:

- Diagnostic sequence: records, planning flow, digital and analog pathways • Silicone mock-up: purpose, limitations, and workflow

12:30 – 2:00: Lunch

2:00 – 3:30:

- Occlusion applied to functional esthetics • Functional parameters in anterior and posterior esthetics

3:30 – 3:45: Break

3:45 – 5:00:

- Live demonstration: diagnostic workflow and mock-up fabrication

DAY 2

22 AUGUST 2026

Preparations, Ceramics & Adhesive Substrates (Lectures + Live Demonstrations)

9:00 – 10:30:

- Indications and limits: veneers, fragments, micro-restorations • Preparation logic in preservation-driven esthetics

10:30 – 10:45: Break

10:45 – 12:30:

- Guided preparation with controlled reduction • Margin strategy and finishing lines

12:30 – 2:00: Lunch

2:00 – 3:30:

- Ceramic selection: thickness, translucency, and substrate influence • Adhesive substrates and compatibility principles

3:30 – 3:45: Break

3:45 – 5:00:

- Live demonstration: guided preparations on mannequins

DAY 3

23 AUGUST 2026

Full Hands-On Training (Complete Simulation) Entire Day Dedicated to Practical Execution

9:00 – 10:30:

- Hands-on: silicone mock-up fabrication from diagnostic planning

10:30 – 10:45: Break

10:45 – 12:30:

- Hands-on: guided preparations with clinical guides on mannequins

12:30 – 2:00: Lunch

2:00 – 3:30:

- Hands-on: adhesive cementation sequence • Isolation, adhesion protocol, polymerization techniques

3:30 – 3:45: Break

3:45 – 5:00:

- Hands-on: occlusal adjustment and esthetic finishing • Individual corrections and instructor feedback • Final clinical refinement and case review

COURSE FEE

PACKAGE 1

2 DAYS LECTURE + 1 DAY HANDS ON
25 PAX ONLY

FEB 2026 - MAY 2026
RM3900

Early Bird

RM4500

Normal Price

PACKAGE 2

2 DAYS LECTURE ONLY

FEB 2026 - MAY 2026
RM1950

Early Bird

RM2300

Normal Price
