AESTHETIC COMPOSITE FOR
ANTERIOR AND POSTERIOR

17 - 18 OCT & 5 - 6 DEC
DR NURUL HUDA HASAN

Course Coordinator

Dr. Nurul Huda Hasan earned her Bachelor of Dental Surgery in 2004 and began her career in the Oral Surgery Department at HKL, where she served for a decade. She later broadened her experience internationally in Dubai and completed the MFDS examination in Abu Dhabi. In 2013, she pursued a Comprehensive Certification in Implantology with the University of Berne, Switzerland, and the University of Sharjah, UAE, and in the same year completed her MSc in Aesthetic Dentistry. Her contributions to the field were recognised with her nomination as a Fellow of the International College of Dentists in 2014.

She recently completed her PhD in restorative and aesthetic dentistry, during which she developed a new tooth proportion formula tailored to the Malaysian population across different ethnic groups.

Dr. Nurul currently serves as President of the Asian Academy of Aesthetic Dentistry and is the former President of the Malaysian Association of Aesthetic Dentistry. Her professional interests span analogue and digital smile design, the use of prefabricated composite resin in aesthetic rehabilitation, composite materials, and adhesive dentistry. She also leads academic development as Chief of Academics at The Dental Academy Malaysia while continuing her clinical practice in Dental City Dental Clinic.

Learning Objectives

At the end of this course, the participants:

- ✦ Should be able to do a thorough treatment plan with option on which materials to choose from micro to macro invasive.
- ✦ Learn on the many simple and feasible ways on handling mild to moderate cases with composites to the more complicated procedure.
- ✦ Will learn the advances on adhesive dentistry and incorporated it into their direct restorative treatment with more confidence.
- ✦ Learn the artistic of layering composites with the many modern school of thoughts on this concepts and apply it to their daily direct restorative treatment.

Course Curriculum

DAY 1

The treatment planning in adhesive aesthetic rehabilitation.

- The conventional planning workflow and the new digital workflow.
- The state of the art of dental adhesives.
- Adhesion of restorative materials on the dental tissues
- The effect of the polymerization on the adhesive bond strength

Hands-On practical part:

- Class III, IV & V direct composite restorations, diastema closure, peg lateral
- The integration of different matrices and alternatives or injection moulding techniques for anterior direct restoration.
- Rubberdam placement
- Placement of composite with and without silicone matrix
- Isolation and adhesive bonding
- Composite layering mapping
- Shape and texture in direct composite resins.
- Finishing and polishing techniques.
- Finishing and Polishing for Primary, Secondary and tertiary anatomies

Course Curriculum

DAY 2

Direct aesthetic restorations on posterior teeth: materials and techniques.

- The key to posterior anatomy
- Shades in posterior composites
- Isolation and matrices usage in difficult to assess cases.
- Immediate dentine sealing (IDS) and is it applicable in direct composites restoration
- Case reports on deep caries management
- The importance of using the right materials, and armamentarium in handling deeply seated cavity margins (DME)

Hands-On practical part:

- Direct composite veneers.
- Class I & II direct composite restorations.
- Techniques with Matrices and placement of rubberdam
- Cuspal Guided Placement and other methods in composite placement
- Gross carious tooth - caries free techniques, pulp protection, micro etching
- Deep Margins elevation and large sub gingival carious cavity - how to handle cases
- Finishing and Polishing procedures in anterior and posterior teeth.

Course Fee

RM850
LIMITED TIME
