

Dr Annapurny Venkiteswaran

Comprehensive

Paedodontics

4 – 6 December

Building Confidence in
Paediatric Dental Care

COURSE SUMMARY

The course is designed to cater specifically to the needs of participants, enabling them to understand and value the significance of managing the evolving dentition. It offers a comprehensive exploration of the assessment process for children, encompassing dental status, soft tissue evaluation and habit analysis. Since handling pediatric patients presents distinct challenges, dentists may find it challenging to deliver optimal treatments or utilize their preferred dental materials. The primary objective of this course is to empower participants with the expertise and practical know-how to develop a well-rounded approach that considers all relevant factors influencing treatment decisions.

LEARNING OBJECTIVES

The participants of this course will be able to:

- Comprehensively assess the paediatric dental patient and be able to identify the treatment needs and suitable approach to tackle their dental problems.
- Provide adequate support in terms of patient education and intervene with appropriate preventive techniques.
- Choose the right material and technique for managing dental caries and pulp pathology.
- Plan the long term management of the primary and mixed dentition to minimize developing malocclusion.

COURSE CO-ORDINATOR

**DR ANNAPURNY
VENKITESWARAN**

Dr. Annapurny graduated from University Malaya, Kuala Lumpur in 2002. She completed her Clinical Masters In Paediatric Dentistry in 2010 and also obtained a Membership of Faculty of Dental Surgery, England in 2008.

She is a trained clinical hypnotherapist and obtained her Diploma in Hypnotherapy from London College of Clinical Hypnosis in 2015. She has recently completed a PGDip in the field of Health Economics from the University of South Wales.

Dr. Annapurny is currently an Associate Professor at the Faculty of Dentistry, UITM and is actively involved in teaching and research. Area of interest includes Dental Traumatology, Craniofacial Anomalies and Hypnosis.

She currently holds the position of Vice President of the Malaysian Society of Clinical Hypnosis and Editor-In-Chief of Malaysian Journal of Paediatric Dentistry.

COURSE CURRICULUM

LECTURES

Assessment

- E&D: A Guide To Thorough Dental Assessment In A Child
- Growth & Development: What We Should Know
- The Anxious Child & Parent
- Early Childhood Caries
- Molar-Incisor Hypomineralisation Assessing the Mixed Dentition

Preventive Dentistry

- Current Concepts in Preventive Dentistry: Early Intervention
- Fissure sealants: When, Where & How
- Anticipatory Guidance & Advice for Patients At Risk
- Chromogenic Staining

Restorative Techniques

- Choosing The Right Materials To Work With: GIC vs Resin Composites
- Isolation Techniques
- Strip Crowns
- Stainless Steel Crowns
- Microabrasion & Resin Infiltration

Pulp Therapy in Primary Dentition

- Deep Caries Management
- Pulp Therapy in Primary Dentition
- Dental Infection: How To Manage it

HANDS-ON

After this hands on, the participants should be able to manage:

Fluoride Application Techniques:

- Fluoride Varnish
- Fluoride Gel
- Silver Diamine Fluoride

Rubber Dam Techniques:

- Floss Tie
- Using Wedgets

Composite Build Up Using Strip Crown Technique

Microabrasion & Resin Infiltration

SSC Techniques:

- Conventional Method
- Hall's Technique

Pulp Therapy in Primary Dentition:

- Pulpotomy
- Pulpectomy
- Lesion Sterilization & Tissue Repair (LSTR)
